

# THE DEAN TRUST

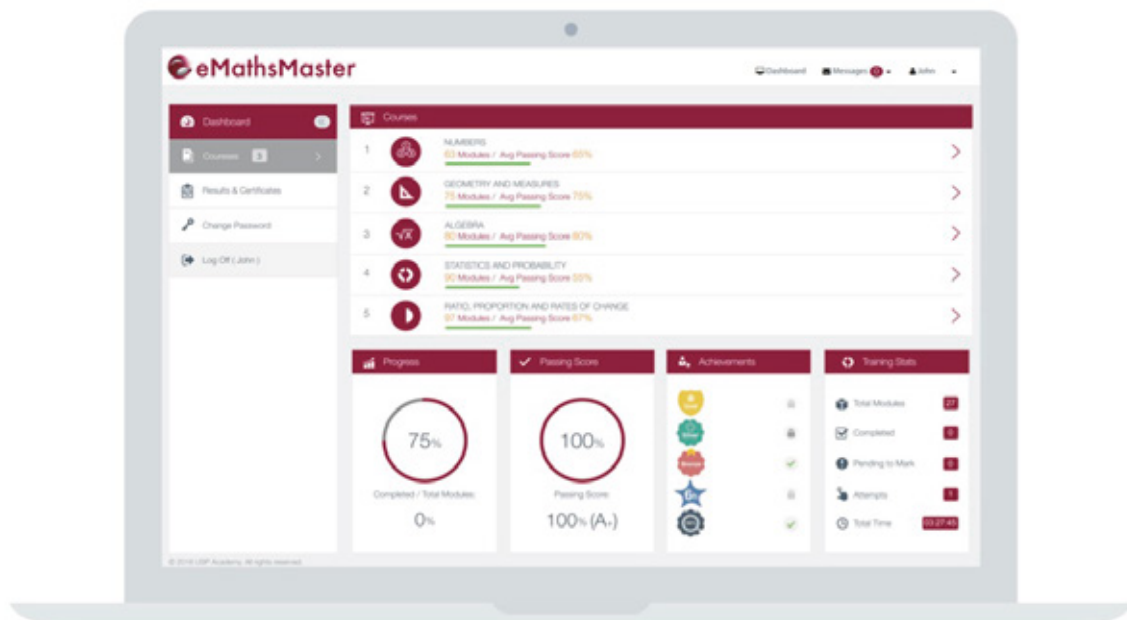

Presents  
**eMathsMaster**

# Teacher Training Edition

## Online Video Based Maths Teacher Training

The eMathsMaster platform is an intuitive and intelligent Maths training programme that retrains existing non-Maths teachers to be able to quickly deliver effective Maths lessons to KS2, KS3, KS4 and GCSE.

## Who is this course for?

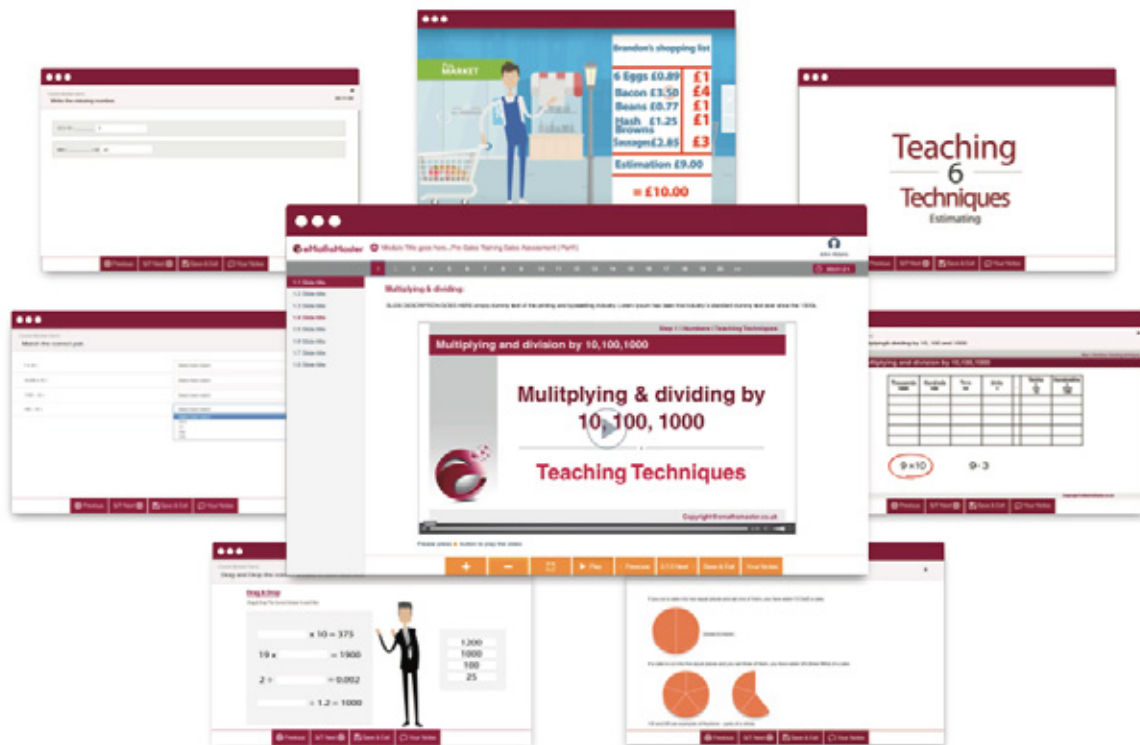

For Headteachers, the eMathsMaster programme offers an affordable, timely and value for money solution to the shortage of good, effective Maths Teachers. By retraining members of the school's existing teaching staff so that they can start teaching Maths, it releases pressure on the Maths specialists to enable them to deliver more targeted teaching and deliver better results.

The retrained teachers can start delivering good lessons extremely quickly, ensuring the pressure on Maths specialists is reduced. The system provides teaching tools such as optional pupil access to the Learning Management System to support the retrained teacher in class.

# Why eMathsMaster?

There are over 600 Maths lesson modules, 600 Maths Assessments and 600 teaching techniques modules that cover the entire 2016/2017 UK Maths curriculum covering Year 5 to Year 11 for KS2 to KS4/ GCSE

-  Online video based programme includes: Class Lessons, Teaching Techniques, Deep Thinking, Developing Reasoning & Engaging Pupils, with assessments & practice questions to check understanding of concepts
-  Optimised for all mobile and desktop devices, accessible any time, anywhere
-  The eMathsMaster platform is a secure and robust Learning Management System
-  Teachers can also give pupils access to the eMathsMaster scalable LMS platform, including the full UK Maths curriculum lessons and Maths assessments. The teacher also has the capability to create bespoke learning materials and tests. Pupil engagement and result tracking tools are included.
-  Competency based assessments ensure subject mastery for both Teacher and Pupils alike.
-  All materials developed with The Dean Trust and offer interactive and engaging learning that is fully supported both online and offline.
-  Full reporting tools for Headteachers to monitor progress of individuals or teams in real time.

# How to order?

Buy online at: [emathsmaster.co.uk](http://emathsmaster.co.uk)  
or call **0203 245 2558** to set up an account or  
to arrange an online demonstration.

## The eMathsMaster Process

1

### Join eMathsMaster

Order eMathsMaster online and get immediate access or call 0203 245 2558 to discuss setting up the account. Access is immediate and via an online log-in.

2

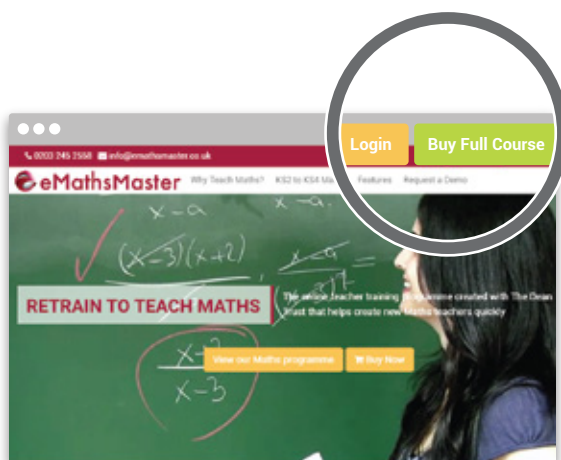

### Start the eMathsMaster programme

The entire programme is loaded into the system. The step-by-step learning process will enable Teachers to gain subject mastery very quickly.

3

### Start Teaching Maths

Once the Teacher has passed the Lesson and Teaching Techniques modules for a particular step in the curriculum, the Teacher, once confident, will have the necessary skills to deliver that lesson to class.

## Course Curriculum

All 12 steps of the revised Maths UK National Curriculum for KS2, KS3, KS4 & GCSE are included.

Numbers

Geometry and Measures

Algebra

Statistics and Probability

Ratio, Proportion and Rates of Change
